The sequence of diagrams illustrates the steps of the Euclidean algorithm for finding the GCD of 12 and 18. The diagrams are as follows:

- Diagram 1: A large triangle (18) and a smaller triangle (12) are shown. The smaller triangle is placed inside the larger one, with a remainder of 6.
- Diagram 2: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
- Diagram 3: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
- Diagram 4: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
- Diagram 5: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
- Diagram 6: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
- Diagram 7: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
- Diagram 8: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
- Diagram 9: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
- Diagram 10: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
- Diagram 11: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
- Diagram 12: The remainder (6) is shown as a small triangle. The larger triangle (12) is shown with the remainder (6) placed inside it, with a remainder of 6.
